State Career and Technical
Education Director

Unmanned Aerial Systems

CERTIFIED

Unmanned Aerial Systems

Issued to: Jeffrey Hamilton

Date issued: 12/18/2025

Certified Industry Skills and Knowledge

This certification verifies the candidate has successfully achieved the following industry competencies

Students will gain an understanding of current Federal Aviation Administration (FAA) Small Unmanned Aerial Systems (UAS) laws and standards required to fly drones legally in the National Air Space (NAS).

Students will understand how weather impacts UAS flight and sources of aviation weather information.

Students will discover the new and upcoming technologies being used in UAS applications.

Students will understand ethical and social responsibilities associated with UAS operation.

Students will understand how drones are used in the real world, the related jobs, and the requirements for those jobs.

Students will learn flight operations skills: preflight, safety checks, flight and post-flight assessments, and any minor maintenance required.
